```
// Synthetic source listing. No packages, files, or network access are needed.
const totals = [12, 18, 9, 21];
const report = { name: "Reader workshop", count: totals.reduce((sum, value) => sum + value, 0), description: "A deliberately long description makes it easy to compare wrapping in portrait and landscape PDF exports." };

function describeReport(item) {
    return `${item.name}: ${item.count} items. ${item.description}`;
}

console.log(describeReport(report));
// END-OF-SAMPLE: Check that this line survives the PDF export.

```
