```
// Same behavior as code-layout-original.js, with shorter source lines.
const totals = [12, 18, 9, 21];
const report = {
    name: "Reader workshop",
    count: totals.reduce((sum, value) => sum + value, 0),
    description:
        "A deliberately long description makes it easy to compare " +
        "wrapping in portrait and landscape PDF exports."
};

function describeReport(item) {
    return `${item.name}: ${item.count} items. ${item.description}`;
}

console.log(describeReport(report));
// END-OF-SAMPLE: Check that this line survives the PDF export.

```
